

```
x = 15
y = 4
print("Addition (x + y):", x + y)
print("Subtraction (x - y):", x - y)
print("Multiplication (x * y):", x * y)
print("Float Division (x / y):", x / y)
print("Floor Division (x // y):", x // y)
print("Modulus / Remainder (x % y):", x % y)
print("Exponentiation (x ** y):", x ** y)
```

## OUTPUT

```
Addition (x + y): 19
Subtraction (x - y): 11
Multiplication (x * y): 60
Float Division (x / y): 3.75
Floor Division (x // y): 3
Modulus / Remainder (x % y): 3
Exponentiation (x ** y): 50625
```
